CREDITS

Production Editor, Joe Kjellander, O '89; Production Assistant, Marie Mize, O '87; Technical Editor, Hal Church, X '80. The Board of Editors would like to thank the *Hawkeye Engineer* magazine for the use of their computer and desktop publishing software.

The GEAR is the official publication of Theta Tau National Engineering Fraternity and is published fall and spring. The magazine is an educational journal devoted to matters of fraternity interest and is sent at no cost to alumni whose addresses are on record. Send change of address to Theta Tau Central Office, 9974 Old Olive Street Road, St. Louis, MO 63141-5984. Third class postage has been paid at Seattle, Washington.

COLLEGE FRATERNITY EDITORS ASSOCIATION

Letter from the Grand Regent

Randall J. Scheetz, O '79

When I think of Theta Tau, the first thing that comes to mind is my chapter as it was when I was a student. Theta Tau is people—not just an organizational structure. I will forever remember the good times that my brothers and I experienced while student members. Intramural teams, parties, projects, playing tricks on lawyers and other special Theta Tau events are many of the things that come to mind almost instantly when someone mentions Theta Tau. My recent activities with Theta Tau from other chapters have added to my fraternal experience.

My fraternity brothers are the people that I identify with to this day. Perhaps the reason that I identify with this particular group of people has to do with the experiences that we shared. We have so much more in common than just the music of our college days. We have the same friends, had the same professors, same intramural sporting teams and attended the same parties. I still regularly see many of the Brothers of Omicron Chapter of the 70's. College life, common curriculum, pride in the engineering profession, the same Theta Tau Fraternity Ritual and ideals are the shared experiences that bond us together now, just as they did

in those college days.

Many of us manage to stay in contact with our college buddies—most don't reach much farther. One of the reasons that I've become involved as an alumnus was to give me a purpose for meeting regularly with my college friends. A side benefit has been meeting and working with other brothers of different backgrounds and ages from all across the nation. It is hard to gain a national sense of Theta Tau without attending a national convention or, at least, visiting a number of chapters. I've had the opportunity to gain an understanding of the 'national fraternity'. I am certain that you would be surprised by the similarity of members from different chapters or from the same chapter during different eras. Sure, everyone is different—I'm not disputing that. The point that I'm trying to make is that many of the experiences we shared with our college friends, are experiences shared by Brothers of Theta Tau. Meeting a Theta Tau does not compare with meeting another Professional Engineer or a member of ASME, ASCE, or IEEE. There must be something else that bonds us together.

There are plenty of good reasons to become actively involved in Theta Tau as an alumnus. From a personal

standpoint, you may find your brothers are useful as business contacts, information resources, heads of various technical or community groups, good golfers or just fun people. Effort should be concentrated on involving alumni through the formation of alumni associations—interacting for each member's benefit and promoting Theta Tau as a truly national professional engineering fraternity.

An alumni association provides a structure and an effective network of contacts. When a chapter or a brother is looking for a speaker on a particular subject or is organizing a plant tour, we have a member in the right place to help. Theta Tau has members in every engineering discipline imaginable. Also, many of our engineering members have switched careers to financial planners, lawyers and management consultants. A little free advice can go a long way to solving a difficult problem.

It is embarrassing to me that we do not have active alumni organizations in major metropolitan areas like Chicago, Dallas, and Los Angeles. There are over 300 alumni in each of these cities. It should be easy to get 20-30 alumni to attend regular events, providing the program was interesting, developmental and/or fun. How

(continued from page 3)

could gain business contacts and sharing fun experiences with 20-30 brothers not be worthwhile! A Theta Tau gathering at major technical shows always gives the out-of-towner something to identify with. I would consider a breakfast or dinner with brothers at a Welding Show or AutoFact a real benefit of membership.

Other than individual benefit, there are many positive things that can happen through groups of Theta Tau members. Alumni meetings can be very beneficial, from a national perspective, when the group decides to work on a project. For example, an alumni association in Chicago could start new chapters at Northwestern,

IIT or DePaul. It could hold meetings during large technical shows that attract many out-of-town members. It could plan and host a national convention. (Conventions have been hosted by alumni associations in the past.) Any of these projects could happen in addition to normal interaction, seminars, social events and the fun things that groups of Theta Tau members enjoy!

As college students we were looking for something more from college life than a textbook education, that is why we chose to become members of Theta Tau. We should now be looking for something more from Theta Tau than just fond memories!

What sort of effort is required to organize alumni in your area? How can you get linked into an existing network? Much information and as-

sistance is available from our Central Office in St. Louis. If you desire, we will supply a list of names (or mailing labels if you wish) to contact others in your area. I would suggest a social (organizational) meeting to gauge interest. Only a handful at the beginning can really turn into a lot down the road. Please contact the Central Office (address inside the front cover) for more information. Perhaps someone else from your locale has already contacted us!

I think you will find the new shared experiences worth your while. We don't grow and the fraternity doesn't grow by dwelling on fond memories. There is a place for these fond memories, but that place should be right next to the new experiences that can be shared with other alumni in your area.

Colony Certification Banquet

University of Michigan - Dearborn and Lawrence Institute of Technology

A banquet was held at Bonnie Brook Golf Club to honor the members establishing colonies at University of Michigan — Dearborn and Lawrence Institute of Technology. The colonies decided to have this banquet as a joint event, which demonstrates how they are working together. Banquet arrangements were made by Don Caruana (UM-Dearborn).

The banquet was a gala event attended by over 100 students, alumni and guests. Detroit area officers in attendance included: UM-Dearborn Colony Past President Mark Holzhauser and President John Feiler; LIT Colony President David Stevanovski; Epsilon Beta Chapter Regent Mike Palmer; Iota Beta Chapter Regent Brian Cronan, and; Detroit Alumni Association President Beecher Eaves (Epsilon Beta '49). Also in attendance were five members of the Executive Council (Scheetz, Huff, Pope, Bettinger, and Palardy), Eastern Regional Director William Bowman and Past Grand Regent George Dodd.

Reception and dinner was fol-

lowed by Grand Regent Scheetz presenting colony certificates to presidents of each of the new colonies. Mark Holzhauser spoke on behalf of UM-Dearborn Colony and David Stevanovski spoke on behalf of LIT Colony. Jerome Palardy, Student Member of the Executive Council, reflected on the beginnings and growth of the new

colonies and the individuals that were involved. Past Grand Regent Dodd presented his thoughts on Theta Tau and life. The entire program was videotaped and a copy may be checked out by contacting the Central Office. This event was unquestionably the single biggest Theta Tau event in the Detroit area for many years.

**The next issue of *The Gear*
will contain information about
the new Theta Tau colonies at**

**The University of Virginia, Charlottesville, VA;
Oakland University, Rochester, MI;
and
The University of Windsor, Windsor, Ontario,
Canada**

New Detroit-Area Colonies

LAWRENCE INSTITUTE OF TECHNOLOGY COLONY CERTIFIED

Lambda Tau Fraternity was officially certified as the Lawrence Institute of Technology Colony of Theta Tau Fraternity on February 8, 1987. Twenty-eight members were initiated as the original members of the colony. The certification ceremony was conducted by Grand Regent Scheez, Grand Vice-Regent Huff, Grand Scribe Pope, Grand Marshal Bettinger and Executive Council Member Palardy at the Engineering Laboratories Building at the University of Michigan — Dearborn. A Reception and Banquet was held at Bonnie Brook Golf Club. (See related story.) Lambda Tau Local Fraternity was formed for the sole purpose of becoming a Theta Tau Chapter. Initial contact was made by student members of Epsilon Beta Chapter (Wayne State). Jerome Palardy, Student Member of the Executive Council, provided guidance and maintained weekly contact from summer through certification day. There is no question that the support of Epsilon Beta Chapter and Iota Beta Chapter (Detroit) hastened the process of becoming a colony. The Colony has been very active since the early days of their formation in summer 1986. Committees have been working in the areas of professional development, pledging, petition, housing and, of course social. A tour of Burroughs and speakers were the initial professional development activities. The first fund raiser was a raffle at a "pre-holiday party". The party was attended by over 600 people from all the Detroit metro area schools.

The majority of the members of the LIT Colony are sophomores and juniors. A strong base of underclassmen will lend them stability and an opportunity to get their feet firmly on the ground without a high turnover

rate. (Imagine your company with a 25-50 percent turnover rate per year, 100 percent turnover in less than four years and a new president every year.) Turnover is a tough problem to overcome and colonies are establishing traditions, rather than perpetuating them. Early stability is key and LIT Colony should be in good position to become a healthy chapter of Theta Tau very soon.

LAWRENCE INSTITUTE OF TECHNOLOGY (LIT)

Russel E. Lawrence founded Lawrence Institute of Technology during the Great Depression with a dream of preparing students for leadership in a new technical era. Russel Lawrence told a Detroit News reporter in June 1932, "This institution is founded on the principle of integrity of teachers and the fostering of a real spirit of educational cooperation between industry and learning."

When LIT opened on September 6, 1932, about 300 students were enrolled. The school offered students an opportunity to attend classes during the day or evening or both. Also, students could pay their tuition for courses on credit or installment payment. The first campus was in Highland Park, Michigan.

Russel Lawrence died in 1934, leaving his 26 year old brother, E. George Lawrence, to assume the presidency. After World War II, the enrollment jumped to 2,000. George Lawrence sought land for a new campus site. The land he acquired, he sold to a company which built the first shopping mall in the nation (Northland Mall). From the profits made from the sale, George Lawrence purchased a new site a couple of miles northwest of Northland Mall. In 1955, the first building on this site was

opened and the school commenced on what is now the present campus of Lawrence Institute of Technology.

Originally, LIT opened as an engineering school only. Other fields of study were subsequently added. The School of Technology was established in 1950, School of Management in 1952, School of Architecture in 1962, and the School of Arts and Sciences was established in 1967. In 1977 a housing facility was opened. This addition allowed non-commuter students to attend a traditionally commuter school. There are presently over 6,200 students enrolled in day and evening classes supported by over 350 full-time and part-time faculty. LIT is the largest private school in Michigan.

LIT COLLEGE OF ENGINEERING

Lawrence Institute of Technology was founded as an engineering college in 1932. Most colleges were experiencing difficult times during the Great Depression, but LIT filled the need of educating while a student was working full-time. Thus, day and evening classes have been offered since the schools inception. The original faculty largely consisted of professors from the then ailing University of Detroit (present home of Iota Beta Chapter). Bachelor and Master of Science degrees were originally offered in Aeronautical, Architectural, Automotive, Chemical, Civil, Industrial, Mechanical, and Metallurgical Engineering.

The Aeronautical school was very active in the years prior to World War II. Research and participation in glider and airplane competition highlighted this era. A LIT student built the "Yankee Doodle" glider that repre-

(continued)

sented the United States in the 1939 International Aerobatic Sailplane Contest held in Paris.

Some degrees originally offered were discontinued either because of natural attrition or, in the case of Aeronautical Engineering, because of the relocation of the United States Center for Research to the west. Other schools of engineering were added. Architectural Engineering was added with the School of Architecture in 1962 and Construction Engineering replaced Civil Engineering in 1973.

Today there are three basic fields of engineering study: Construction Engineering; Electrical Engineering; and Mechanical Engineering. Over 3,100 students are enrolled in these ABET accredited programs. LIT is one of the largest engineering schools in the nation.

The college emphasizes professionalism and the common body of knowledge that defines the engineering profession. The Fundamentals of Engineering (EIT) Exam is required of all engineering graduates. As Dr. Robert W. Ellis, Dean of LIT School of Engineering, stated when endorsing Lambda Tau to become a Colony of Theta Tau: "We feel Theta Tau will provide an exposure to dimensions of the profession not currently emphasized in other organizations and, as such, will be a great service to the college and our student body. Theta Tau, because of its professional orientation and breadth across the engineering disciplines ideally fits our needs."

UNIVERSITY OF MICHIGAN — DEARBORN COLONY CERTIFIED

Pi Beta Fraternity was officially certified as the University of Michigan — Dearborn Colony of Theta Tau Fraternity on February 8, 1987. Twenty-two members were initiated as the original members of the colony. The certification ceremony was conducted by Grand Regent Scheetz, Grand Vice-Regent Huff, Grand Scribe Pope, Grand Marshal Bettiniger and Executive Council Member

Palardy at the Engineering Laboratories Building at the University of Michigan — Dearborn. A Reception and Banquet was held at Bonnie Brook Golf Club. (See related story.)

Pi Beta Local Fraternity was formed for the sole purpose of becoming a Theta Tau Chapter. Initial contact was made by student members of Epsilon Beta Chapter (Wayne State). Jerome Palardy, Student Member of the Executive Council, provided guidance and maintained weekly contact from summer through certification day. There is no question that the support of Epsilon Beta Chapter and Iota Beta Chapter (Detroit) hastened the process of becoming a colony.

Many events have already taken place by this new colony. A plant tour of Ford Motor Rawlinsville Facility in December was well attended. The main objective of the plant tour was to expose the students to many aspects of engineering. The tour provided an opportunity to see the latest in robotics and automation, powder metal operations, metallurgical laboratory, quality control laboratory and the production of small motors and armatures. Two members, Chris Rosen and Don Caruana, were successful in their bid for the only two open seats in the student government. The colony has held some social events at the Epsilon Beta chapter house. They also co-sponsored a hay ride that was attended by over 100 people.

The University of Michigan — Dearborn Colony of Theta Tau is well positioned to become a Chapter in the very near future. They are increasing their numbers and have well organized professional and social programs in addition to strong support from the college administration.

UNIVERSITY OF MICHIGAN — DEARBORN

The University of Michigan — Dearborn was created in the mid 1950's to respond to the need for college trained personnel in the metropolitan Detroit business community. Ford Motor company was prompted by this need and donated 210 acres of land surrounding Fairlane, the estate of Henry Ford I. Ford also donated

\$6.5 million to the University of Michigan for the construction of a campus for junior and senior level students.

Ground was broken for the physical plant at Dearborn on May 22, 1958. At that time, William Stirtor, a University of Michigan Vice-President, became the first Director of the campus. His belief in cooperation with business and industry set a course for the University of Michigan — Dearborn (UM-D) which is still followed today. The concept of cooperative education, alternating semesters of study and professional on-the-job experience, was an integral part of Stirtor's philosophy. When the first regular term began in September 1959, 34 students were enrolled in three programs: Business; Mechanical Engineering, and; Industrial Engineering. Additional programs were added the following year. The first graduate program was introduced in 1963 in Mechanical Engineering. The school continued catering to only upperclassmen until 1971, when the first freshmen class was enrolled. UM-D has experienced continual growth since that time. New buildings include a library, athletic facility, additional classrooms and the University Mall. There are plans to construct new computer-aided engineering laboratory buildings.

The University of Michigan — Dearborn has come far in just 29 years. Today, more than 7,000 students are enrolled in 51 bachelor degree programs and six masters degree programs. ABET accredited programs include such majors as Mechanical Engineering, Electrical Engineering, and Industrial and Systems Engineering. The progress by this school demonstrates what can take place when education and industry cooperate to the benefit of the students, the school, the corporations, and society. UM-D continues to graduate students that have CO-OP experience combined with the proper education to fill the needs of employers today. The addition of Theta Tau Professional Engineering Fraternity to the UM-D campus will provide a dimension that was not previously available at that school.

Chapter News

Wayne State University

Epsilon Beta

Alumni involvement in the chapter has become an important issue since celebrating our 35th anniversary in May of 1986. At the anniversary picnic, many alumni returned to share experiences and renew friendships.

After an official visit by Craig Huff, the idea of expanding the National Fraternity through extension became quite intense. Brother Palardy, now Student Member of the National Executive Council, spearheaded the effort to colonize Detroit area engineering colleges.

This year, special picnics and parties were sponsored by the chapter, such as a pig roast, beach bash, and the Engineering Student Faculty Board picnic. Professional activities included a Fermi II Nuclear Plant tour and a "Dress for Success" presentation.

Mississippi State University

Kappa Beta

Last year, our professional activities included two community service projects and seven professional development dinners. For our fall service project, we renovated a run-down elementary school playground, and we built picnic tables for a local nursing home. This spring we salvaged bricks from a ruined building to help Habitat for Humanity. After a hard day's work, we had salvaged enough cinder blocks to build a small house.

At each professional development dinner we invite people from various professional backgrounds to speak on professionalism and engineering. Our speakers for the last year included members of our engineering staff, private entrepreneurs, and chapter alumni.

We hosted a Founders Day/Homecoming celebration, a Halloween costume party, a Thanksgiving dinner, a Christmas party (with all toys going to Toys for Tots), and a Valentine's party. In addition, we had two chapter campouts. In April, we held our Spring Formal/Senior Recognition Banquet. Much to our surprise and delight, we had a large turnout of alumni at the event. We have held several pledge-active activities this year, including on-campus breakfasts and hammer-making parties. Finally this year, we have twice had the pleasure of visitors from Mu Chapter.

Tennessee Technological University

Lambda Beta

We have done a lot of work on our rush program. We rushed freshmen who have yet to get to Tennessee Tech, holding a reception for those who came to take an engineering scholarship test. We met over 80 students and their

parents who expressed an interest in us. Follow-up mailers were sent, along with a mass mailing to all incoming freshmen in the engineering curriculum.

Our annual Founders Day banquet was a success. Our speaker was Southern Regional Director Brad Besmer. We enjoyed his visit very much. Our annual Alumni Picnic brought in over 250 brothers and their wives for a weekend of fun.

Lambda Beta Chapter also took part in intramural athletics, participating in football, softball, volleyball, and wrestling.

South Dakota School of Mines and Technology

Omega

Rush was very successful this year. Omega Chapter can be proud of its newest members. Dry rush worked very much the same way it did last year. The smokers consisted of a meeting held on campus that was open to all and provided students a chance to ask questions about the fraternity and to meet the actives. The smokers were followed by a social activity. The chislic feed, casino night, and the Second Annual Theta Tau Open were all very successful.

Member participation in campus organizations is very strong. We have members in student senate, Student Association, campus radio station, College Republicans, Hardrocker Flying Club, master chorale, SDSM&T judicial council, and several others. We also have two new actives on the school football team.

The Founder's Day banquet was special this year because Robert E. Pope was our special guest for the celebration.

The subject of house improvement is on everyone's mind because of the construction of a computer room in the house. The room is well under way and should be finished soon.

University of Iowa

Omicron

The 86-87 academic year was another exciting one for the members of Omicron Chapter. After returning from hosting the National Convention in St. Louis, the members of Omicron began the fall semester with our various rushing activities. Rush was culminated in October with the annual Pig Roast to celebrate Founder's Day. Omicron alumni from across the United States returned to the university to take part in the festivities.

Again in the spring, Omicron sponsored the annual

(continued on next page)

Kurtz lecture, an all-college professional presentation. An all-Engineering College seminar was organized in April with Dr. James Ashton, O '64, as the speaker. Topics presented were the F-16 fighter plane production and the Trident Submarine project.

One of the most exciting events of the year was the purchase of a chapter house for the members of Omicron! Since the paper-signing in May, much work and thought has been put into the house to get it ready for habitation in the fall.

University of Kansas

Zeta

The 86-87 academic year was full of remarkable functions, but outstanding among them was the effort we put into rushing. Last year, members set up a Theta Tau information booth at the student union during the enrollment period to inform incoming engineering students of our activities. This idea, together with several well-planned rush activities have made membership to our chapter appealing to most hard-working, ambitious engineering students at the University of Kansas.

Our activities were not limited to rushing, though. We were also active in intramurals, professional development, social events, and fund-raising activities. As a whole, we had a very successful season in intramurals, going undefeated in basketball.

In order to further our professional insight, our pledges and members made plant trips to Frito-Lay and the engineering firm of Bibb and Associates. In addition, we had alumnus Kent Pennybaker share his industry experience with us. We also attended many other talks on state-of-the-art engineering practices, including speakers from TRW.

Our alumni contributed to last year's success. Their Zeta Cog contributions made our 1986 fund drive overwhelmingly successful and served as a demonstration of the strong fraternal bond between the active members and alumni of Theta Tau.

The joint initiation with our brothers from Upsilon Chapter proved to be an important factor of last year's success.

Michigan Technological University

Beta

Beta chapter currently has 22 active members attending school. This fact will enable us to start the school year with a full house for the second year in a row, continuing Beta's steady financial improvement. Although 22 members may seem like a small amount, we feel it allows everyone to be very close yet still comfortable in the house. It also provides financial stability.

Our financial improvement has enabled us to keep up

with the almost daily maintenance of the old house atop Anchor Hill, such as a new septic pump and installing some water control in the basement. We have also remodeled the living room, bought a new clothes dryer, and installed a new bar downstairs. We are currently remodeling our kitchen.

Homecoming and Winter Carnival are the top two social events on campus. During Homecoming we took group titles in tug-of-war and Hobo Car competition and finished fourth in overall competition. For Winter Carnival, the chapter again built the huge welcome statue, making Theta Tau the first name seen by hundreds of arriving tourists.

The intramural activities remain the most popular of chapter activities. This year we took group titles in bowling, wrestling, and hockey, and were runners-up in football.

Overall the past two years have been successful ones, and Beta is as strong as ever.

Purdue University

Phi

In the past year Phi Chapter's "PROJECT 2000" experienced continuing success. The Alumni Association of Phi Chapter was successful in continuing the contribution fund drive for the development of a new house for Phi Chapter and in doing so is contacting many alumni who have previously lost touch with the chapter.

For the third year in a row, Phi Chapter participated in Purdue's Old Master's Program. Selected fraternities and sororities host distinguished alumni of Purdue that have made significant contributions in their field of work. Additionally, Phi Chapter also participated in Purdue's Occupational Outlook Program which has a similar format as Old Master's. Phi Chapter also held an open house for the various engineering professors of the active members. Finally, Phi Chapter is looking for a new faculty advisor to replace Donald Schlueter, who is teaching in Malaysia on a professor exchange program.

After last year's building of our "professional quality" volleyball facilities by the fall pledge class, we are sponsoring a beach v-ball invitational tournament to raise money for the American Lung Association.

North Carolina State University at Raleigh

Rho

The chapter house has been improved by new curtains and shades, the redecoration of a bathroom, and a new television donated by the graduating class of 1987. We are now building a distinctive sign to be erected in the front of the house.

Civic activities included originating, planning, and leading a clothing drive and participating in a food drive during the Thanksgiving season.

(continued on page 12)

University of Wisconsin - Platteville

Nu Beta

One of the activities in which we have participated is the United Way Fund Drive on our campus. This consisted of distributing and collecting donation envelopes.

M-Ball is a semi-formal dinner and dance held every spring. This past April, over 200 couples attended the event. Before the dinner, we host Theta Tau and engineering alumni. All faculty and students outside the engineering disciplines are welcome at the M-Ball, and Nu Beta Chapter would like to extend an invitation to this event to members of the other chapters of Theta Tau.

University of Wisconsin - Madison

XI

Xi Chapter has undergone numerous changes during this past year. We are in the process of restructuring our rush program to make it more effective in attracting more candidates. Presently, we are trying to make rush more personal by helping interested students through the difficult registration process. This gives a large number of prospectives a chance to meet a member of our chapter and learn more about our fraternity. We feel that people will be more interested in getting to know us if we show a genuine interest in getting to know them.

Our social chairman organized our professional devel-

opment activity for the term. Despite poor attendance, a small group of members toured a local chemical processing business. Interesting questions and several free samples topped off this educational visit to the Capital Brewery and Beer Garden. We again wound up the semester with our chapter banquet.

The fall term looks to be better than ever with a brat sale before every football game and several parties. One difference we hope for is to see more alumni at our events. We're looking forward to a great year!

Case Western Reserve University

Delta

Delta chapter spent the last year trying to increase the low membership of the chapter. With two members, the task of rush was difficult, but Bob Pope and the central office helped a great deal. Three new pledges were initiated. With the graduation of one of the members, the chapter is left with four returning actives.

Even with the low membership, Delta sent individuals to the regional meeting at Purdue University in the fall and to the installation of University of Michigan-Dearborn and Lawrence Institute of Technology colonies. Once again the chapter sponsored the Fourth Annual Computer Card Skyscraper Contest during Engineer's Week.

For the coming year, Delta Chapter's main goal will be to increase membership. Because of the high morale of the chapter, we feel this year will mark the return of Delta Chapter. As always, the chapter is looking for successful rush ideas for the coming year.

In Memoriam
