## IOTA GAMMA INSTALLATION

The Fraternity continues to grow with the installation of Iota Gamma Chapter at the University of Cincinnati on May 22. This milestone event will be featured in the next issue of *The Gear*.

## INAUGURAL LEADERSHIP ACADEMY

The inaugural event sponsored by the Theta Tau Educational Foundation will be held this August 12-15 at The Ohio University in Athens. Rho Beta Chapter serves as our host. See page 6.

## 2000 MEMBERSHIP DIRECTORY

The Fraternity recently mailed a Directory Form and letter requesting response and information to make your listing complete and up-to-date. See page 9 for more information.

**The National Capital Alumni Club  
and Gamma Beta Chapter of

Golf Tournament*

Founders' Day Weekend, Fall 1999  
In the Washington, DC Area

For more info, please contact Alex Rosenheim  
(703) 525-2086 or <arosenhe@lawco.com>

## MULTI-GENERATIONAL FAMILIES

Several "Theta Tau families" were identified at the 1998 National Convention. We'd like to hear from others for an article in the next *Gear*. If there are Theta Tau members spanning three or more generations in your family, please write about yourselves, preferably including captioned photo(s) of those belonging to Theta Tau. Send information to the Theta Tau Central Office. Thank you.

## MEMBERSHIP RECOMMENDATIONS

Referrals received will be forwarded to the appropriate chapter. If you know engineering students at a school where we do not have a chapter, we would be happy to hear of them also. See page 10.

## AVAILABLE FOR EMPLOYMENT

As a service to members seeking employment or a change in employment, listings are available in the next issue - deadline August 15, 1999. Member's name and address may be included, or (upon request) a code will be assigned and responses received by the Central Office forwarded to the member. Contact the Central Office to be included.

# Michigan Chapter Installation

Theta Gamma Chapter was installed at The University of Michigan Ann Arbor on April 17, 1999. This was a memorable day for the Fraternity. The Chapter Installation was held at the Crowne Plaza Ann Arbor with Grand Regent Haas presiding.

Eighteen Charter Members were initiated followed by nine others in a second ceremony. Members representing twelve chapters with graduation years spanning five decades attended the events of the day. Following the initiation ceremonies, new Regent **Jason J. Bailey**, was installed as presiding officer of the chapter.

Professor Tony England of the Radiation Laboratory at University of Michigan College of Engineering represented the University at the Installation Reception and Banquet held that evening at the Crowne Plaza. At the banquet, **Carl H. Fischer, IV**, accepted the charter on behalf of the new chapter.

CARL FISCHER (RIGHT) ACCEPTS THE CHAPTER CHARTER FROM GRAND REGENT HAAS

Past Grand Regent **George G. Dodd** spoke briefly and Executive Director Emeritus **Robert E. Pope** provided the principal address.

As a prelude to the installation ceremony, the colony members sponsored a trip to the Detroit Tigers game the previous evening for colony members, national officers, and other guests. The event enabled everyone to become better acquainted while taking in a game (at which the Tigers beat the champion

Yankees!) in the stadium's final season. One can only hope that Comerica Park will be as great a place to watch a game as historic Tiger Stadium.

The installation of the chapter at Michigan's namesake institution brings to eight the number of chapters in the Great Lake State. Obviously, this is the largest number of chapters for the Fraternity in any given state — a fitting

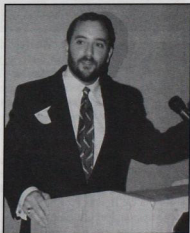

THETA GAMMA INITIATES POSE AFTER THE BANQUET

tribute since Theta Tau traces its history further in Michigan (through Beta chapter's forebear) than in any other state. The Fraternity now has chapters at 7 of the 11 Big Ten schools.

The University's engineering school was founded in 1853. Significantly, it was the first school in the nation to offer the following engineering degrees: Metallurgical (1854), Naval Architecture and Marine (1881), Electrical (1895), Chemical (1898), Aeronautical (1914), Nuclear (1953), and Computer (1965). Today, the engineering school's enrollment includes nearly 4500 undergraduate students. About 900 bachelor's degrees are awarded each year.

Our congratulations to the members of the newest Theta Tau Chapter!

EXECUTIVE DIRECTOR ABRAHAM ADDRESSES THE INSTALLATION BANQUET ATTENDEES

# NEW REGIONAL DIRECTORS PROFILED

**Larry A. Schnitzer**, Epsilon Gamma '97, is Central Regional Co-Director. He was initiated into the Northwestern University Colony in April 1994, and was initiated as a

charter member of his chapter in November 1995. He served as Vice-Regent, Scribe, Corresponding Secretary, and Colony President.

Larry also acted as his chapter's first Delegate at the 1996 National Convention. Currently, he is the Alumni Adviser for the chapter. Larry became Co-Director along with Jennifer Lisiak in 1998. He and Jennifer have sought to create a stronger inter-chapter brotherhood among those in the Central region and plan to repeat a summer event this year.

He is an engineer at MPC Products Corporation, an electromechanical aerospace component manufacturer in the North Chicago suburb of Skokie.

Originally from Las Vegas, Larry enjoys jogging, classical music, playing bass guitar, and attending Cubs games.

**Jennifer L. Lisiak**, Epsilon Gamma '97, is currently Central Regional Co-Director with Larry Schnitzer. She was the Northwestern University Colony's first Pledge class president. She served in various offices including colony Vice President and Regent once Epsilon Gamma Chapter was installed.

Jennifer has participated in every national meeting since becoming a member and presented the petition to become a chapter at the 1995 National Conference. She also was chosen as Epsilon Gamma's Outstanding Student Member. Since receiving the degree BSChE, she has worked in the specialty chemical industry.

Jennifer enjoys keeping busy play-

ing a variety of sports (including golf) and going to downtown Chicago with friends and Theta Tau brothers. Originally from Milwaukee, she also likes the Packers, Summerfest, Brewery Tours, and the Milwaukee Mile Race.

**Adam Pederson**, Eta Gamma '96, graduated from the University of Colorado at Boulder in December of 1996 with a degree in Aerospace Engineering Sciences, with Distinction. There, he helped form a local fraternity and as President saw it through certification as a Colony.

DIRECTORS, CONTINUED PAGE 4

Other Regional Directors were profiled in the Spring 1998 issue of *The Gear of Theta Tau*.

## EDUCATIONAL FOUNDATION SCHOLARSHIP WINNERS

The Theta Tau Educational Foundation is pleased to present the 1998-99 Scholarship recipients. After the awards were reestablished last year by the Fraternity, the Foundation has assumed responsibility for them. Congratulations to these members who demonstrated academic achievement, but also contribute as leaders at their respective chapters and campuses.

**David Weaver**, a Civil Engineering major with a minor in Business Administration at The University of Toledo, plans to pursue a master's degree in either Civil Engineering or Business Administration after graduation in May 2000. He chose to major in Civil Engineering because he is interested in steel construction and the heavy construction industry. David has served as Treasurer, Pledge Instructor, and Fundraising Chair, and is currently Regent of Chi Beta Chapter. He is enrolled in the Honors Program, has been on the Dean's List every semester, and is a member of the American Society of Civil Engineers, Phi Eta Sigma, and Tau Beta Pi. David is involved in community service with Habitat for Humanity, Bowling for Kids, Teetering for Tots, and tutoring. He has interned with the Ohio DOT.

**Brandon Kelly** is majoring in Mechanical Engineering at Michigan Technological University. He plans to graduate in December 2001. Brandon lives in the Beta Chapter house and has served as one of two house representatives to the Interfraternal Conference. Brandon participates on his chapter's intramural hockey, flag football, and soccer teams. He assists with improvement projects around the house which will be extensive this summer as the house on Anchor Hill undergoes major renovation. He plans to pursue a position in the automotive industry and has found a co-op job in that field this summer. After a few years, he hopes to return to school to pursue his master's degree in engineering.

**George Parrino**, a Civil Engineering major at the University of Wisconsin-Madison, plans to complete the Construction Engineering Management Program. He has been interested in building and design since he discovered Lego and Lincoln Logs as a child. He has held engineering related jobs and co-op positions in the building and construction industry.

SCHOLARS, CONTINUED PAGE 4

# An American in España

This time, we chronicle the life of a brother whose illustrious professional career has been mostly abroad.

**L**awrence E. Bell, Chi '49, a United States citizen, electrical engineer, and international executive has spent two-thirds of his nearly 75 years outside the USA. He has had most challenging assignments in the Iberian Peninsula / Europe and Central America. He has traveled widely in Europe and throughout Central and South America, and made a recent month's visit to China. He has been most active in community business and educational activities in Spain.

BELL WITH SON MARTIN IN THE PYRENEES

He has weathered two major Revolutions in Venezuela and in Portugal. A high point in his professional career took place in Barcelona, 50th Anniversary Meeting in 1979 of the American Chamber of Commerce in Spain meeting simultaneously with the American Chambers of Commerce - Europe, with HQ in Brussels, Belgium (home of the future European Common Market). Then National President of AMCHAM-Spain, Brother Bell was responsible for arranging the Barcelona ceremonies. Bell was one of the Founders and first Board President of the American School of Madrid. He was also a founder of the U.S. Navy League of Madrid. His varied professional and academic interests have included international outdoor lighting standards, solar energy developments, and educational/academic standards. Bell was a founding member of AVIEM: The Venezuelan Association of Electrical & Mechanical Engineers, in Caracas.

Bell was born in 1924, in a small mining town in Chihuahua, Mexico. His English paternal grandfather and father, graduate mining engineers, owned and operated a copper mine near Cusihiuriachic, in the state of Chihuahua,

Mexico. Their mining ventures in western Colorado and Arizona had been marginal until they went south and invested in then-modern mining machinery to increase productivity and profitability of their Mexican mining ventures.

In 1921, Brother Bell's father met his future wife in a picturesque town of San Francisco de Borja. The couple moved to Cusi, where eldest child Lawrence was born three years after their wedding. Mexican politics, then as now, were somewhat violent and dynamic: the Bell mine was confiscated by the Revolutionary Government. The Bells moved to Bisbee, Arizona, some 30 miles from the Mexican border. As the family grew, the children attended Bisbee Public Schools. English was the language outside the front door, while Spanish was the language within the home walls.

In September 1942, as Lawrence was starting his senior year in school, the principal asked: "Who wants to go to college?" Bell was one of two to declare interest. Interested candidates had to volunteer for the US Army Air Corps and satisfy the requirements of a special and unique officer training Academic Course of Study. Bell took the challenge and embarked on the one-year course in February 1943. Studies were at second-year, college technical levels. Bell, at the time, hadn't yet graduated from high school. Most of his peers had completed college freshman or sophomore studies.

Bell graduated from BHS and from the Air Corps Pre-Meteorology Program simultaneously. Bell's group was destined for officer candidate field training in North Carolina, and then assigned to the Officer Air Communications Training Course at Yale University. Upon completion of the 9-month crash program, Bell was commissioned a second lieutenant and was posted as an Instructor in the same course. Wanting some action before the war's end, he volunteered for service in the Pacific. During a stopover in Panama, en route to Japan, the Bomb was released. In Panama, Bell was assigned to the David Air Base, near Costa Rica.

"My only personal/professional lament is that I should have gone on my own, ... long before I actually did! With generally good health, a fine home life and great family, good friends, fine books, super computers, and worldwide TV, what more can anyone wish for? It is well to count one's blessings and enjoy every available minute!"

promoted US Outdoor Lighting Standards, Turn Key Power Plant installations. He was Caracas District Manager and weathered the Venezuelan Revolution.

In April 1959, he was transferred to Europe as Managing Director of International GE-Spain in Madrid, responsible for all GE activities and interests in Spain where GE had long-term capital investments and technical licensing agreements. IGE-Spain was the marketing arm for the 97 USA Product Departments. Bell was on the Board of Directors and Management Committees of four joint corporate ventures.

BELL, CONTINUED PAGE 4

# 1999 THETA TAU RUBE GOLDBERG MACHINE CONTEST

BY JOSEPH J. MARTIN, PHI '99

The 1999 Theta Tau National Rube Goldberg Machine Contest held April 10 was a complete success. Again, Phi Chapter at Purdue University hosted the national competition.

BELL, CONTINUED FROM PAGE 3

In his spare time he dedicated his efforts to serving on the Board and later as Madrid President, then National President of the American Chamber of Commerce. At the time, the largest Chamber in the world. His final post was as Chairman of the Board of Presidents of American Chambers of Commerce in Europe.

Profound corporate changes in GE caused all international operations to be assigned to domestic divisions. Bell temporarily left Spain and for two years was managing director of Allis Chalmers in Mexico.

Bell returned to the Iberian peninsula: this time to Portugal, as CEO of MLNDET & Cia, at the time, the largest cork producer in the world, with 3,000 workers, three factories in Portugal and one in the United Kingdom. He achieved a total reorganization of all very ancient manufacturing facilities and introduction of cost controls, cork purchase routines, etc. The business was evolving favorably, until a Revolution brought very drastic changes. He returned to Barcelona, Spain: this time as the managing director of two companies: a marketing and a manufacturing facility, owned by Burndy - Norwalk, CT. Bell then decided to work for himself and established Orion Technologies, S.A., a Spanish corporation headquartered in Madrid, representing international technologies and marketing activities. Bell was CEO and majority owner. He also established the World Wide Marketing Group, Inc., which continues with current activities. Now in semi-retirement, he much enjoys travel and other pastimes.

begun in 1988. The goal was to tee a golf ball in the most complex way. The machine had to perform at least 20 steps and complete the task. While this may sound simple, it is really much more complicated. Some machines had synchronized sound and light systems, while others were completely independent of electrical power. Not only do these machines incorporate technology, but more importantly Rube Goldberg machines give students a creative way to use their mechanical, electrical, chemical, or sometimes just general knowledge.

Six teams, including two Theta Tau teams, were entered in the competition. The competing teams, all winners of local contests, came from Hofstra University, Purdue University, the University of Texas Austin, Vanderbilt University, and two from the University of Toledo (one of which entered through the contest at Oakland University). Members of the Society of Manufacturing Engineers at Purdue built the 1999 National Champion machine. The machine, in the course of 54 steps, had a car race, sprint race, Purdue football victory over IU, weightlifting, and much more. The theme given to this winning machine was the "Wide World of Sports." Placing second was the elaborate machine from Texas. The second place finish was somewhat of a let down for the returning champions. The third place team, with bright yellow construction hats and a big sign, was Chi Beta of Theta Tau. This team, which came purely for the fun, left proudly with its trophy. The Simpsons team displayed by Omega Beta Chapter (Hofstra University) was a huge hit, winning the Peoples Choice Award. Kids and parents both found they could relate to this machine. Omega Beta Chapter has been a participant since 1993 when it entered while still a Colony. It has won a trophy in 6 of the 7 years it has entered.

SEE RELATED RUBE NEWS IN PHI AND CHI BETA  
CHAPTER NEWS ARTICLES, PAGE 5

DIRECTORS, CONTINUED FROM PAGE 2

He then returned shortly after graduation to be initiated as a Charter Member of Eta Gamma Chapter. Upon graduating he accepted a job with Boeing in Seattle, working as a project engineer on the ongoing structural design and field support for the Air Launched Cruise Missile and its conventional counterpart. He has held this job for the intervening two years, although he recently left Boeing to return to Colorado.

SCHOLARS, CONTINUED FROM PAGE 2

George has served as Scribe of Xi Chapter and has also been Publicity Chair and Outer Guard. He has attended the 1996 and 1998 Theta Tau Conventions, serving as Alternate in 1996.

He is a member of the American Society of Civil Engineers, participates in Habitat for Humanity, is President of the student organization for Mechanical Electrical Specialty Contracting, and is a member of Chi Epsilon honor society. George has been on the Dean's Honor List every semester.

**Beta** Chapter had dinner with Michigan Technological University's President Dr. Curtis Tompkins with all student members and several alumni attending when Grand Regent **Lee C. Haas** presented **James A. Mitchell**, Beta '65 the plaque symbolizing induction into the ΘΤ Alumni Hall of Fame.

Regent **Gerald Rice** has pledged \$500 in five years if certain chapter goals are met. Gerald would like to see Beta Chapter become more involved on campus, participate in Homecoming and Winter Carnival events, and consistently compete for the Schrader Award. He hopes others will follow his lead by making a similar commitment.

**Xi** Chapter was very excited about this semester because we had an opportunity to start a tradition. During E-week, in February, we hosted the first ever Theta Tau Dunk O' thon for charity. This was a chance for students to take aim at professors and help a good cause at the same time. It is hoped that the Dunk O' thon will become an annual E-week event at the University of Wisconsin-Madison.

**Pi** chapter has been extremely active this semester with several major activities, but none could top the fantastic formal event titled "Thomas Jefferson's Birthday Bash." We created the event initially as the celebration of our chapter's 75th anniversary in the fall, but moved the event to the spring as an annual event where brothers from surrounding chapters and alumni could come help us celebrate the birthday of the University of Virginia's founding father. Brother **Sing Chen** spearheaded a fantastic effort by all the brothers that culminated in an absolutely superb evening.

**Phi** Chapter again sponsored the successful annual Rube Goldberg Machine contest at Purdue. After a two-year hiatus from the contest, Phi Chapter's machine entry, with the theme "Professional Wrestling vs. the PGA tour," placed second only to the eventual national winners. We would like to thank and congratulate Chi Beta and Omega Beta Chapters for participating in the National Contest providing the

opportunity for our chapters to get together for the weekend. Hopefully, more chapters will participate in the future.

**Rho** Chapter participated in the Professional Fraternity Council's canned food drive. We also held an Investment Workshop open to the entire campus.

Two of our web-savvy members held a Web Workshop where the basics of html, email, ftp, etc. were taught.

The chapter's community service projects included Focus Day where members helped The Ohio University College of Engineering give tours of the labs and the building for incoming freshmen. We also had members participate in and raise money for Swim for Diabetes. Members

helped proctor, grade, and hand out tests during a junior high Math Counts competition. We helped with cleanup and other work at a local recycling facility. Our fundraiser for the quarter was a Valentine's Day carnation sale.

**Tau Beta** Chapter hosted the successful Western Regional Conference at SMU with six other chapters attending.

The weekend consisted of numerous activities to encourage members to meet and interact with one another. Saturday's schedule included a motivational speech by Peter Gifford, Director of the SMU Wellness Department. The design competition was to construct the tallest tower made from straws and straight pins.

**Chi Beta's** road to the National Rube Goldberg Contest was a difficult one, but it was worth it. Except for Christmas Break and Spring rush, everyone got together two nights a week and worked on turning our ideas into reality. The second week before the contest, the machine suddenly seemed to come together. We had only one other Toledo team as competition, the ASME chapter. The judges announced that ASME had won by 2 points out of 400. We really felt that our machine should have won.

# THETA TAU EDUCATIONAL FOUNDATION

## LEADERSHIP ACADEMY

August 12-15, 1999  
The Ohio University  
Athens, Ohio

The Theta Tau Educational Foundation is pleased to announce the inaugural Leadership Academy hosted by **Rho Beta Chapter**. The very generous contributions of those shown on the next page as well as countless others (who will be listed in a subsequent issue of *The Gear*) who also demonstrated their support for the Foundation are making this an event which is certain to provide near limitless value to our student members. Contact the Central Office for information.

Be certain also to see the Foundation's Scholarship winners who are profiled on page 2 of this issue. Our deepest thanks to all who made these activities possible through their generous contributions.

### CHI BETA, CONTINUED FROM PAGE 5

Not to be knocked down for long, we had an idea. With approval of the Chairman of the national contest and Phi Beta Chapter, we entered the contest at Oakland University. This time, we felt much more relaxed, not expecting to win. When Chi Beta was announced as winner, we were stunned. Now we could enter the national contest! Thanks to the kind hospitality of Phi chapter, we had a place to stay and a chance to get to know some brothers from Omega Beta also there for the contest. The ASME team from Toledo was shocked to see us setting up our machine on the platform labeled "Oakland University."

The contest was at a new level compared to what we'd seen in the local contests. The cameras and reporters crowded around each machine, and the audience seemed huge! We mingled with the other teams and got a closer look at their machines while the judges tabulated the final scores. With the other amazing machines there, we didn't expect to win anything. The judges announced that Third Place went to Oakland University. We were Oakland! It was better than we had dreamed - we had actually placed in the National Rube Goldberg Contest! We had come to the contest with the expecta-

tions of having fun - this was just the icing on the cake!

**Psi Beta Chapter** celebrated its anniversary with an alumni vs. actives softball game and a BBQ lunch. The evening before the softball game, a party was held to welcome the returning alumni. Many attended and had a great time catching up with one another. On Saturday, the actives battled valiantly against the alumni, but in the end, we all knew what great softball players are our alumni. Then we fired up the grill and had a great meal of burgers and hot dogs followed by a hard game of kickball. This year's game was a huge success; one that will be repeated in the coming years.

**Eta Gamma** organized and sponsored the Egg Drop competition as part of the University of Colorado at Boulder E-Days, a week-long celebration of the College of Engineering. This year, Egg Drop was open to teams from UC and area high schools. Prizes are donated by local Boulder merchants. The devices holding the eggs are thrown

off the roof of the engineering center. The Egg Drop is great fun and increases awareness of our Fraternity.

**Cincinnati Colony** took the opportunity to give something back to the community. This past winter, colony members and pledges put their engineering skills to the test in putting the finishing touches on a Habitat for Humanity House. We spent the day cutting and hanging drywall with few tools. Before the afternoon was over, we had completed almost the entire upstairs of the house. Another philanthropic event we undertook this past year was a canned food drive. We distributed flyers in the neighborhoods surrounding the university. Later, we went house to house collecting the non-perishable food items that the community so willingly donated. We collected an entire SUV full of boxes of food. It was worth braving the cold weather knowing that our efforts would ensure some families a nice holiday meal.

**Charles Luckman**, Kappa '31, Alumni Hall of Fame Laureate, passed away on January 26 at his home in Los Angeles. He graduated magna cum laude from the University of Illinois School of Architecture. Brother Luckman earned international recognition in two careers. He was considered the "Boy Wonder" of

American business when he became president of Lever Brothers at the age of 37. He returned to architecture in 1950, designing such landmarks as the U.S. Air and Naval Bases in Spain, Los Angeles International Airport, Cape Canaveral Missile Test Center, Madison Square Garden in New York, and Prudential Center in Boston. He introduced market research concepts to the field so his buildings would reflect what the people want. He was elected to the College of Fellows of the American Institute of Architects, served on the Board of the California State University System and on the boards of more than 60 other organizations. He served as an advisor to eight U.S. Presidents and on numerous presidential commissions and committees.

**Charles E. Wales**, Epsilon Beta '53, Past Grand Regent, Alumni Hall of Fame Laureate, and renowned educator, passed away on May 16 at his home in Bruneton, West Virginia. A Charter member of his chapter at Wayne State University, Detroit, his two terms as Grand Regent (1968-72) highlighted 18 years of service on the Executive Council. Brother Wales had fine rapport with students, listening to them and effecting changes in the Fraternity to meet their needs, such as establishing the position of Student Member on the Executive Council. He presided when Theta Tau's first colony was installed as a chapter at the General Motors Institute. During the period of the Vietnam War, he helped student members understand the importance of a strong national organization. He devoted his life to improving the education process – developing the Guided Design system of teaching. Most of his career was at West Virginia University. He received the American Society for Engineering Education Award for innovation in education. Theta Tau named the 1974 Convention in his honor.

## IN TOUCH IN 2000

The completely updated 2000 Membership Directory is coming soon! We just need your help to get it started. The new Directory will enable you to rekindle old friendships, let others know where you are and what you are doing, and assist you in making valuable social and professional contact with others who share the Theta Tau experience. There are also some new features planned for this edition so be certain to **reserve your copy of this resource for the new millennium today.** We will include job categories in the geographical section again with this issue in keeping with the highly popular 1994 Directory edition. Your personal Directory listing should include name, occupation, and business and home addresses, phone numbers, and email addresses. Each alumnus with a known address will appear in the alphabetical, chapter roll, and geographical sections of the Directory. A CD-ROM version of the Directory is available for the first time!

A copy of the Directory will be sent to each member participating. In order to cover the large cost of producing this Directory, we invite your contribution toward this project as indicated on the form. Your support and participation will be much appreciated by all members of our Fraternity. Thank you for your assistance in making this project successful! Please return the Directory Form to: **2000 Directory, Theta Tau Central Office, 655 Craig Road, Suite 128, St. Louis, MO 63141-7168 or fax to 314/997-3234.**

## Searching for Engineering Excellence

*Career Search Associates is an executive search firm that specializes in the placement of engineers on a regional and national level. Our clients rely on us to represent the top talent within the engineering field. We pride ourselves on the professional relationships we build with both our clients and candidates. Our needs are diverse throughout the engineering arena; however, we place an emphasis on:*

- ◆ Project Engineers
- ◆ Design Engineers
- ◆ Manufacturing/Industrial Engineers
- ◆ Electrical/Controls Engineers
- ◆ Engineering Management

All conversations will be strictly confidential.

For consideration, please contact:

*You've interviewed the rest; we'll introduce you to the best.*

Ross Knudtson  
Engineering Recruiter
