University of the Pacific Colony of Theta Tau

University of the Pacific Colony of Theta Tau
3601 Pacific Ave.
Stockton, CA 95211

Mr. Michael T. Abraham, Executive Director
Theta Tau Professional Engineering Fraternity
1011 San Jacinto, Suite 205
Austin, TX 78701

Dear Mr. Abraham:

Greetings from the University of the Pacific Colony of Theta Tau. Over the past two years our Colony has come together to form strong bonds. We have become an active fraternity on our campus with the ability to organize a set of goals and achieve them. Over the past months our Colony has worked hard in preparing this petition, and I am now proud to present our official request to gain Chapter status.

On November 21st of 2009 our founding class was bestowed the honor of becoming certified as an official Colony of Theta Tau. Since that point, our numbers have grown from fifteen founding members to over 60 initiated brothers. Eight of those members have successfully graduated from Pacific and have consistently been interested in our active body. These members continue participation, even though they have obtained alumni status.

Our Colony has achieved a level of organization that allows us to strive actively to achieve our goals of developing and maintaining a high standard of professional interest, to be able to unite our brothers in a strong bond of fraternal fellowship, and to provide service to our community. Pacific currently has other professional engineering organizations such as SWE, SHPE, ASME, ASCE, BMES, and ACM. However, none of those organizations provide an atmosphere that encourages multi-disciplinary interaction. Thus, the Colony of Theta Tau creates an impact at Pacific by being the only all inclusive engineering group.

Through all of our successes and the ability to persevere through struggles, our Colony has learned many valuable lessons. Through our growth and stability, I believe we are ready to earn Chapter status. Throughout this document, I hope that you will be able to see all of our efforts up to this point and our excitement to continue as brothers of Theta Tau.

Sincerely,

Tom Andrew, Regent '10-'11
University of the Pacific Colony of Theta Tau

History

University of the Pacific Colony of Theta Tau

On March 1, 2009, Theta Tau alumnus Vinay Reddy visited the University of the Pacific to meet with a group of students interested in chartering a professional engineering fraternity on campus. Two weeks later, those students created a new organization called Pacific Professional Engineers. This group consisted of engineering students from various backgrounds and disciplines. They developed a common goal of establishing a fraternity built upon the ideologies of scholarship, service, professionalism, and brotherhood.

This goal of becoming a professional engineering fraternity was the first of its kind at Pacific. The ideals of professionalism and brotherhood are distinctly different from the goals of either the Association of Engineering Students (AES) or honor society Tau Beta Pi. In a school with high participation in Greek life, engineering had yet to be represented among the professional fraternities at the university.

The School of Engineering and Computer Science had shown its support for the Pacific Professional Engineers' ambition by bestowing a \$300 start-up fund. A couple members took this ambition and met with students of neighboring schools who shared the same interest in establishing a colony. During spring break, one of the members visited the UC San Diego Colony (now Epsilon Delta Chapter) to introduce Pacific as one of their contemporaries and our colony also contacted UC Berkeley Colony (now Epsilon Chapter).

As the year was coming to an end, the goal of becoming a colony of Theta Tau was nearing its completion. On November 21, 2009, after months of preparation and hard work, 15 members successfully became the Founding Class of the newly established colony of Theta Tau at the University of the Pacific. In attendance were the Grand Regent, the National Executive Board, three members from Theta Tau's Beta chapter, Dr. Gary Martin, and alumni members from various chapters. The Pacific Professional Engineers were now known as the "University of the Pacific Colony of Theta Tau."

In Spring 2010, the Alpha pledge class of the University of the Pacific Colony of Theta Tau, consisted of seventeen pledges. After their pledging process, they were initiated as colony members on April 17, 2010. The Beta Class would then follow in Fall 2010 with thirteen members and the Gamma Class in Spring 2011 with eleven members. Lastly, the Delta class was initiated into the colony in Fall 2011, consisting of seven new members. Currently, the colony stands strong with forty-six members, three of whom are on co-op, and an alumni network of eight members.

History

School of Engineering and Computer Science

The University of the Pacific was founded in 1851. Engineering instruction started at the university in 1924 as a concentration within the College of the Pacific. In 1957, the engineering program moved from the College of the Pacific. Under the leadership of Dean Diefendorf, it became the University's School of Engineering offering a Bachelor of Science degree in Civil and Electrical Engineering.

In the fall of 1969, Robert L. Heyborne PhD, Professor of Electrical Engineering at Utah State University, was selected Dean of Engineering. Under Dr. Heyborne's leadership the civil and electrical engineering programs were accredited in the Fall of 1971 by the Engineering Council of Professional Development (ECPD), now called the Accreditation Board for Engineering and Technology (ABET). That same year the school adopted a mandatory cooperative education as a requirement for graduation and is today the only school west of the Mississippi River to have a mandatory co-op program. The chair of the accreditation team in 1994 coined the term co-op program, "the crown jewel of the curriculum."

The school has not only maintained its accreditation in Civil and Electrical Engineering but has subsequently received accreditation in its Computer and Mechanical Engineering programs, the Engineering Management Program, and the Engineering Physics Program.

The School of Engineering and Computer Science's mission is to provide a superior, student-centered learning environment which emphasizes close faculty-student interaction, experiential education, and distinctive research opportunities.

The School of Engineering and Computer Science provides:

- **Personalized Education** with an average class size of 16:1
- **Practical Experience** through a paid 7.5 month internship through our Co-operative Education Program
- **Distinctive Graduate Program** with three concentrations and the opportunity to begin graduate classes as an undergraduate and finish both degrees in just 5 years
- **Hands-on Learning** in over 30 labs within the School

The School of Engineering and Computer Science publishes a annual magazine called "The Rock", which includes, recent news, department updates, and new faculty announcement.

University of the Pacific Colony of Theta Tau

Some more facts about the School of Engineering and Computer Science:

- USA Today: Pacific in top 20 universities nationally for student community service
- Fiske included Pacific in their list of 19 "Small colleges and universities strong in engineering"
 - Pacific is the only private school in the Western U.S. for both "Best Buy" and "Strong Engineering" (2010)
- U.S. News: Top 20% of all (non-doctoral) Engineering and Computer Science programs in the country (2011)
- Ranked #40 on overall best value (2011)
- American Society of Engineering Education: Ranked 21st of 335 ABET- accredited engineering schools for bachelor degrees awarded to women with 28% of its graduates being women (2006)
- Forbes: Pacific is ranked on the Top 300 best colleges by Forbes (2010)
- Payscale
 - Pacific is ranked on the Top 25 best paid graduates of all private research institutions (2010)
 - Pacific is ranked #19 for mid-career salaries for top private universities (2011-2012)
- Sierra Club: Pacific is ranked #68 for "America's Coolest Schools" in the United States (2011)

There are also a few traditions within the School of Engineering and Computer Science, such as, the cardboard boat regatta, Order of the Engineer, and senior project day.

Letters of Recommendation

University of the Pacific Colony of Theta Tau

18 January 2012

Dear Brothers,

I am pleased and eager to support the petition from the University of the Pacific Colony of Theta Tau to become a chapter of Theta Tau Fraternity.

As Regional Co-Director with oversight of this Colony since Fall 2010, I have worked closely with its members and officers, witnessing solid growth in recruitment, programming, and leadership. Since I started, the Colony has doubled its membership, indicating not only a sustainable recruitment program, but also the members' abilities to convey the benefits of membership to their peers. In the past months, the Colony has overcome a struggle for improved attendance by engaging brothers more actively in the decision-making and event-planning processes. Colony officers note instilling this ownership mentality among members has fused a coalition of like-minded individuals into a strong union of brothers.

The operations and organization of the Colony and its officers have improved markedly, as exhibited by substantial increases in their Schrader scores as they embrace Theta Tau's balanced program. Looking ahead this school year, the Colony is assured of reaching our threshold for "good chapters" handily. Colony alumni continue to support and attend colony functions, and local alumni from other chapters have expressed their desire to advise as well. Furthermore, Colony brothers have proven reliable in coordinating with us regional directors, and we have even provided them with additional management education at their initiative.

This Colony has bolstered the prestige of Theta Tau outside of its membership with continuing service to the School of Engineering and Computer Science, both as the assistant dean's on-call volunteers and as leaders of reputable campus organizations. Colony members have enriched Theta Tau's Western Region by learning together from recruitment drives with Omicron Gamma Chapter and the UC Merced Colony, by attending regional conferences and national , and by sojourning several hundred miles to celebrate the installation of Epsilon Delta Chapter in San Diego.

The Colony has overcome early struggles to forge an impressive and dedicated unit by working together as brothers and seeking help when needed – attributes which should be embraced by all Theta Tau chapters. Now just over two years old, the University of the Pacific Colony of Theta Tau has accumulated these learning lessons to complement the pioneers' initial enthusiasm with the vision and self-reflection we expect of Theta Tau chapters. This group has already proven to be a valuable asset to its university, to the Western Region, and to the Fraternity. Based on their growth, camaraderie, and maturity, I believe they will continue to be such an asset as a chapter, thus I recommend you approve this petition for Chapter status.

In H & T,

Daniel P. "Xander" White
TT18 SSSS! XX! ZZ!
Western Regional Co-Director
