

The College of New Jersey Colony of Theta Tau

*Petition for Charter
2021*

Mr. James Gaffney, Executive Director
Theta Tau Professional Engineering Fraternity
Theta Tau Central Office
2131 W. Republic Road #528
Springfield, MO 65807-5705

Dear Brothers,

As a witness of the growth of this organization, I am eager to be petitioning the chapter status of The College of New Jersey's Colony of Theta Tau. I have been honored to serve as the second Regent of this colony and can confidently state that this brotherhood has made a positive impact on each and every active member and alum.

This colony began with five eager engineering students yearning for a sense of community within the engineering culture. In the Spring of 2018, a flyer was posted online by these five students seeking a shared desire amongst other engineering students for professional development, service, and brotherhood. There was an immediate flood of interest, and our colony has matured since then, hosting five semesters of recruitment.

Joining Theta Tau in the Spring of 2019 has allowed me to experience the successes, setbacks, and overall development of this professional organization. The previous Executive Board members were extremely dedicated to their positions and have set the tone for the future of this organization. Operating so independently allowed them to pass down their sufficient knowledge to the upcoming leaders. Fortunately, we were able to meet the incredible brothers of the Zeta Delta and Tau Epsilon chapters who brought some insight to our own young colony. They have continued to serve as a powerful organizational role model for us, and we have learned so much from them as we laid the groundwork for our colony.

Due to the unpredictable circumstances of the pandemic, our colony had to adjust accordingly in order to remain prevalent and active for members, and the TCNJ Community. We have made a seamless transition to this temporary reality by continuing to practice service, profession, and most certainly brotherhood. Our Theta Tau online-events continue to emit an energetic, welcoming atmosphere where members express themselves unapologetically. The number of members who will willingly attend and support other student organization's events is truly outstanding. The relationships with these student organizations have allowed us to spread our name across campus, standing at a proud 77 active members to date. This expansion gave us the ability to maintain an incredible, diverse group of individuals, which we hope will become a part of our legacy here at TCNJ.

I wholeheartedly claim that our colony currently operates just as a chapter would and that we will continue to make the brothers of Theta Tau proud under a chapter status.

In H&T,

Sarah Esposito
Regent (2021)
The College of New Jersey Colony of Theta Tau

Member Signatures

We, the members of the TCNJ Colony of Theta Tau, do hereby petition the Theta Tau Professional Engineering Fraternity for chapter status. We, the undersigned, have all been enrolled in the School of Engineering at TCNJ, and have no affiliations with any organization considered competitive with Theta Tau. We have met all the membership requirements, and the TCNJ Colony of Theta Tau has met all the requirements necessary to become a chapter.

History of TCNJ

The College of New Jersey, often referred to by its acronym TCNJ, is a New Jersey state institution. It has gone through many names and changes over the past 165 years of operation. It opened in 1855 as the New Jersey State Normal School. At this point, it was the first teacher training school in the state of New Jersey. Since then, it has had 5 other names: The New Jersey State Normal School at Trenton, New Jersey State Teachers College and State Normal School at Trenton, New Jersey State Teachers College at Trenton, and Trenton State College. Its current name, “The College of New Jersey”, was previously used by what is now known as Princeton University. The College of New Jersey was located in the city of Trenton for 73 years, and moved locations to Ewing, NJ in 1928. The first structure to be built on Ewing grounds was Green Hall, which has influenced the architecture of the entire campus. By 1972, the school had expanded their major selection to include paths of study outside of education.

New Jersey State Normal School, 1910

Rank

The College of New Jersey has always been a highly competitive institution, this fact even more solidified in the 1970s. For the past 10 years, the college’s acceptance rate has been significantly less than the national average of 55% and now stands at 49%. It is currently ranked as one of the 75 “Most Competitive” institutions by Barron’s Profiles of American Colleges. In the “Northern Regional Universities” category of the U.S. News & World Reports, the college is ranked #4. TCNJ has a 95% freshman retention rate and an 85% graduation rate.

Community

TCNJ is home to over 6,000 diverse students, with over 50 degree options. The schools at TCNJ include Arts & Communication, Business, Humanities & Social Sciences, Education, Engineering, Nursing/Health & Exercise Science, and Science. The College of New Jersey strives itself on diversity and leadership development. There are more than 300 on campus student organizations, which range from social clubs, to Greek life, to professional societies, and everything in between. There is something for every student at this institution, shaping leaders across all professional industries.

History of TCNJ School of Engineering

Engineering was introduced in the School of Technology at Trenton State College in 1971 under the leadership of Dr. Robert Thrower, Dean of Technology. Approximately thirty students graduated from this program in 1976. Programs in Electronics, Industrial Engineering Technology, and Mechanical Engineering Technology were introduced in the late 1970's. All Engineering Technology programs were then terminated under the leadership of Dr. Robert Bittner, and the Bachelor of Science program in Engineering Science was introduced in 1993. The School of Technology was renamed to the School of Engineering in 1996.

In the early 2000's, Dr. George Facas created Bachelor of Science (BS) programs in Computer Engineering, Electrical Engineering, Civil Engineering, Biomedical Engineering and Mechanical Engineering. All of these BS programs have been accredited by the Engineering Accreditation Commission of ABET since 2007.

The School of Engineering is now one of the seven academic schools at The College of New Jersey. Within the School of Engineering exists six engineering disciplines, as well as Management and STEM Education programs. Before a designated STEM building was built in the Fall of 2017, there were two buildings that hosted engineering courses: Armstrong Hall and Forcina Hall. Since the modernized STEM building opened up to students, most discipline-specific classes are taught in either Armstrong Hall or the STEM building.

Engineering Students in front of the STEM Building

TCNJ Engineering Majors

- Bachelor of Science in Biomedical Engineering (BSBME)
- Bachelor of Science in Civil Engineering (BSCE)
- Bachelor of Science in Computer Engineering (BSCoE)
- Bachelor of Science in Electrical Engineering (BSEE)
- Bachelor of Science in Engineering Science (BSES)
- Bachelor of Science in Mechanical Engineering (BSME)
- Bachelor of Science in Integrative-STEM Education
- Bachelor of Science in Technology/Pre-Engineering

History of TCNJ Colony of Theta Tau

Bringing Theta Tau to the TCNJ campus began with our now well-known alumni, Hussain Khajanchi, who at the time was a sophomore Electrical Engineering student. As the only engineering student in his social fraternity, Hussain was looking to join an organization that would help him develop professional skills to become a successful engineer. He consulted one of his peers at New Jersey Institute of Technology (NJIT) about the benefits of Alpha Kappa Psi, a professional business fraternity, when he realized that something tailored for engineers would be much more beneficial both for him and the engineering community at large at TCNJ. There were plenty of organizations at TCNJ that offered these services for students in business, music, etc., but no organizations that offered these same benefits for engineering students. After discovering Theta Tau, Hussain believed that this organization would be a substantial asset to the engineering community at TCNJ. He believed Theta Tau would offer a platform for social and academic development tailored for engineering students. Hussain, along with 4 other members, started the first executive board, gaining immediate interest from over 100 engineering students.

The first step the executive board took in becoming a recognized organization on campus was through student government. After presenting the ideas and values of this organization to student government officials, the interest group for Theta Tau was quickly approved as a recognized student organization in the Spring of 2019. After this, the executive board sent out applications for chair positions, whereby 6 chairs were elected. The 11 board members began operating in true Theta Tau manner and recruited 17 more dedicated members through an interview process among a group of 40 interested engineering students at TCNJ. This brought the organization to 28 members, all of which are the first class of our colony.

In order to proceed with the Theta Tau colonization process, the executive board opened a line of communication with Zack Johnson, Theta Tau's Director of Expansion at the time. The executive board coordinated with Zack to schedule a visit from a Theta Tau National officer to TCNJ's campus for April 12th, 2019. Zack, along with executive board members, toured TCNJ's engineering buildings and met TCNJ's Head of Fraternity/Sorority Expansion, Dave Conner, and the representative for the Dean of Engineering, Dr. Martha Stella (Assistant Dean of Engineering). Zack also gave a presentation to the founding class of this Theta Tau interest group about the benefits of Theta Tau colonization and the process/timeline for the coming months.

Our organization was able to show immense dedication to service, brotherhood, and professionalism, whereby we were able to submit a petition to become an official colony of Theta Tau. Our petition was approved, and thus the planning for a colonization ceremony began.

On September 21st, 2019, our organization planned for the National Officers to come and perform our colonization ceremony. The ceremony was held at TCNJ and was followed with a banquet, where the National Board Members were able to sit and eat with the newly colonized members. There was an incredible sense of brotherhood in the atmosphere as questions were asked to the National Board Members, where they shared their wisdom. The colonization ceremony finished with a unique tradition that will follow through our organization for years to come. This newly adapted tradition included the past Regent, Hussain Khajanchi, and the Regent

at the time, Conor Collins, cutting a celebratory cake together. Although this cake was for the colonization celebration, it will be implemented into every new executive board change to celebrate the past executive board's accomplishments, and to wish the best to the incoming executive board.

Since being colonized, we have had 4 semesters of recruitment, totaling to 77 active members. An immeasurable amount of support for each other, compassion for this organization, and dedication for the development of this organization has been seen since our interest group was formed, and it continues to grow every day. It is truly inspiring to see the growth and development of this colony as it becomes more established.

Awards and Honors

TCNJ Blue and Gold Hall of Fame Inductee

Conor Collins and Elyse Nardoza

Awarded for their leadership on campus, especially in their roles of Regent and Outreach Chair within Theta Tau

The Blue and Gold Award honors students who have made extraordinary and sustained contributions to The College of New Jersey. This award acknowledges an understanding that these students, through the quality of their work and dedication to the mission of the College, will have a positive and lasting impact on the student experience. These individuals have all proven themselves to be critical change-agents, excellent role models for their fellow students, and dedicated and able leaders in and out of the classroom. These individuals represent leadership, scholarship, service and the core beliefs of the College.

TCNJ Mayo Business Plan Winners

Jake DeGennaro & Alex Iorio (2020)

Awarded First Place and \$30,000 for their invention (The Vortex), which collects old fishing line stuck in trees, bushes, etc. near fishing locations in an effort to increase sustainability and improve the environment.

Axel Delakowski (2021)

Awarded First Place and \$30,000 for the Chi-Cup, which is a renewable, naturally-biodegradable, and home-compostable alternative to single use cups.

The Mayo Business Plan Competition is designed to increase student appreciation for the challenge of developing a viable business. Through an iterative process the MBPC recognizes those students best able to articulate a plan that addresses these challenges. In recognition of both the time involved and difficulty of the task, the competition provides a substantial reward for the successful teams.

THETA TAU

PROFESSIONAL ENGINEERING FRATERNITY
Founded 1904

April 8, 2021

Dear Brothers:

I am pleased to write in support of The College of New Jersey Colony of Theta Tau's petition for installation as a chapter. I first met with them on November 23, 2020, and at the time they were already a mature student organization that needed little in the way of guidance. While I have not had the opportunity to visit in person, I have met with their officers regularly via videoconference and been consistently impressed with their initiative, responsiveness to suggestions, and enthusiasm.

Since my initial contact with them, the colony has been operating on a level comparable to many chapters. Their programming and recruiting are thriving in a time when many chapters are working hard to maintain the status quo. On-campus requirements at TCNJ have put them in a position where adopting our health and safety programs required minimal adjustment on their part. They have had positive interactions with both Zeta Delta and Tau Epsilon Chapters and are in contact with their regional director. Their delegation to the combined eastern regional conference was sizeable and they have already selected a delegation to attend the National Convention scheduled for July.

I do not doubt that this colony would make an exemplary chapter and its members exemplary brothers. I am proud to recommend approving TCNJ Colony's petition to become a chapter of Theta Tau.

In H and T,

Dan Jensen
Colony Director

April 6th, 2021

Brothers of Theta Tau,

It is my pleasure to recommend the TCNJ Theta Tau Colony to be initiated as an official chapter of Theta Tau. I believe that this colony shows exceptional potential in upholding the pillars of our fraternity as a chapter.

My name is Jake Zilkowski, Vice Regent of the Tau Epsilon Chapter at NJIT. Ever since becoming a brother of Theta Tau I have held a chair position in my chapter, either it being Assistant New Member Educator, New Member Educator, and now Vice Regent.

I had the pleasure of meeting members of the TCNJ colony before the pandemic and was able to attend one of their social events. All of their current members are really great people and I think they would make a great fit into our fraternity.

In particular, I really got to know the colony's current regent Sarah Esposito and treasurer Hannah Corbisero. Sarah is an extremely kind person who is always looking out for her brothers and has great leadership qualities. Hannah and I know each other from high school, and she is so diligent, professional, and friendly. She was the salutatorian of our class and I have always respected her for her academic accomplishments.

If you need any more information, please do not hesitate to contact me at 201-800-2252, or my email at jz529@njit.edu.

In H&T,

Jake Zilkowski TE, Y!

March 31st, 2021

Brothers of Theta Tau,

It is with honor that I write to you with my recommendation for the Theta Tau Colony at TCNJ to obtain chapter status. As a founding father and recent alumni of TCNJ's Theta Tau Colony, I have experienced and witnessed the vast strides this proud group of Theta Tau members have achieved. Through its on-campus involvement, such as the creation of TCNJ's first ever engineering week, this colony holds a strong presence within TCNJ's engineering and general student community. Since obtaining colony status, the members have followed the Bylaws, Constitution, and incorporated the Ritual as created by Theta Tau's principal founder Erich Schrader. The colony has worked hard to create programs that promote the social, academic, and professional development of its members.

I have no doubt that TCNJ's colony would make a vital addition to the Theta Tau community when granted chapter status. These engineers are truly a special group embodying professionalism, brotherhood, and foundational commitment to the success of its members in their livelihood as engineers. I look forward to the bright future of this group as they grow and contribute to the professional engineering community. Should you have any questions, please do not hesitate to reach out.

Sincerely,

B. Hall

Brandon Hall

Alumni Adviser of TCNJ's Theta Tau Colony

To Whom It May Concern:

It is my pleasure to write this letter of recommendation in order for the Theta Tau Colony at The College of New Jersey (TCNJ) to gain full chapter status.

The purpose of your organization is to “develop and maintain a high standard of professional interest among its members, and to unite them in a strong bond of fraternal fellowship”, and the TCNJ Colony truly embodies this. They typically have a very strong interest in our engineering students across campus. This semester, they accepted 10 potential new members. I am confident that their numbers will continue to grow, and they will become a stronger force on campus. They have various events to strengthen the bond between their members and increase their knowledge, such as inclusive language workshops, creating a mentor-mentee program to assist students who may need additional assistance in certain courses, and have participated in various community service opportunities, both in person (maintaining social distancing guidelines) and virtually.

For the Fall 2020 semester, the organization maintained a 3.381 term GPA, and a cumulative GPA of 3.389. Each recognized organization is also required to submit an Assessment Packet at the end of each semester, highlighting what they have accomplished. The packet focuses on the following areas: academics, chapter operations, recruitment/intake, campus involvement, service and philanthropy, educational programming, and leadership. The colony scored 372.5 out of 415 points and placed in our top recognition category.

The members of this organization are dependable and trustworthy - I can always count on them to fully participate in any of our office's events. Similarly, they manage their responsibilities very well. Many of the members are in other leadership positions across campus, which can often pull them in many different directions, but they always make time to support any community events and submit materials in a timely manner – often exceeding my expectations.

I have now worked with two of their executive boards, and what I appreciate most is how amicable, responsive, and communicative they are. Their scribe sends biweekly email updates, detailing their colony events, co-sponsorship events with other organizations on campus, and any colony updates. Although I connect with their President on a regular basis, I really appreciate them going above and beyond to keep me informed. Other professional staff members have also attested to the great relationships the members of this organization have with campus administrators and officials.

It is for these reasons and many others that I offer my highest recommendation for this colony to become a fully recognized chapter. They have been hard-working, reliable, respectful, persistent, community-oriented, and have a great rapport with our campus community. I would be more than happy to speak to you if you need additional information and details. Please reach out to me at westk1@tcnj.edu or at 609-771-3282.

Sincerely,

Kaitlin C. West, Coordinator for Fraternity & Sorority Life
